TRIAGE NURSE SURVEY

This survey should be administered to the triage nurse AFTER showing the Point-of-care laboratory results.

This patient was enrolled in a research study. You have seen the point-of-care (POC) laboratory results.

The triage level that you assigned was: _____ (Study nurse to fill out)

Do knowing the POC lab results change the level of concern for the immediacy for which the patient should be seen?

☐ YES ☐ NO

If the answer is YES, was your level of concern:

☐ INCREASED – patient is *more* ill than your initial triage impression

☐ DECREASED – patient is *less* ill than your initial triage impression

What would your triage level have been had you known the POC lab results?

_____ (1 to 5)

Is your care of this patient changed by knowing the POC lab results?

☐ YES ☐ NO

If the answer is YES, how was it changed?

☐ Brought patient to the main ED immediately

☐ Administered intravenous fluids

☐ Administered aspirin

☐ Other _____

Was access to POC laboratory results helpful in the triage of this patient?

☐ YES ☐ NO
